SEMI RECESSED

9 X 24 X 6
FULLY RECESSED

Due to space limitations only recessed models are shown. Please refer to the detail drawings for surface mount and semi recessed models.

For over a quarter of a century The Williams Brothers Corporation has been manufacturing fire hose and extinguisher cabinets. Our cabinets are esthetically pleasing with rounded corners on the doors and flush latches so nothing protrudes from the face of the cabinet. They are dependable in design, solidly constructed and intended to minimize space requirement. We are especially proud of our new stainless steel extinguisher cabinets with invisible hinges so the face of the cabinet can be polished without any obstructions. Williams Brothers cabinets are designed with consumer safety in mind.
